7. All roads approaching the troop training grounds were blocked to civilian traffic on 1 August. A convoy of about 50 sedans was seen driving from the autobahr to Camp Altengrabow. It was said to belong to a general and his staff. When the convoy arrived at Altengrabow, two three-engine aircraft circled over the area and subsequently landed at the airfield. Except for mess and kitchen attendents, all German personnel were barred from entering the military reservation on 1 August. Upon the arrival of the general, all troops from Camp Altengrabow moved to the training area with full equipment. Infantry gun fire and the noise of aircraft engines were heard after nightfall. No

searchlights were noticed. The troops returned to their quarters on 2 August. Source did not observe the departure of the general but believed that he left

during the night of 2 August.

8. A soldier of the artillery unit from Bernburg stated that his unit would stay at Altengrabow for a prolonged period of time. This statement was confirmed by the superintendent of a cooperative store who said that the artillery troops from Bernburg would remain at Camp Altengrabow as a camp cadre, whereas the barracks installation in Bernburg would be occupied by new troops. The latter informant returned to Bernburg on 1 August to establish a cooperative

store of the new unit there. (5)

9. A Soviet captain stated that the previous policy of mending soldiers on furlough unescorted has been abolished. Now, soldiers going on furlough are shipped to Brest Litovsk under the supervision of an officer and taken over by another officer there. Their return trip is similarly supervised. (6)

10. On 28 July, 5 or 6 officers and several EM deserted from the camp. During the subsequent search, one captain was apprehended at the home of a German family at Magdeburgerforth. A ban on the consumption of alcoholic liquors and discontinuance of term leave was imposed on all troops at Altengrabow on 25 July. (7)

There were rumors that all the German civilian employees would be replaced by civilians of the U.S.S.R. An officer stated that the pay would be reduced substantially, but that also the prices in stores would be cut. (8) Colonel Tsishokov (fnu) was identified as the commandant of the troop training grounds, and Colonel Lasov (fnu) as the commandant of the Altengrabow armunition 25X1C depot.

Comments. Statements by verkers that elements of five divisions were at the troop training grounds were probably concluded from the fact that the workers constructed targets for five divisions. However, source's estimate of at least 50,000
